From Curwood's
Greatest Book

A wonderful story! It takes you from Broadway to the Great North Lands of our own country, in fact Jasper Park is the setting for some of the most beautiful photography you have ever seen.

Coming Next Wed. "The Sea Tiger,"
with Milton Sills.

COMING NEXT FRI. & SAT.
"Lost at the Front."

Smith-Lowe

A quiet, but pretty wedding was solemnized at the residence of the officiating minister, Rev. W. E. MacNiven, on Wednesday, October 5, at 7:30 p.m. When Gerritina E. Lowe, of Calgary, and Mr. Harry E. Smith of Champion, Alberta were united in marriage.

The bride was prettily gowned in orchid georgette with Italian cutwork in gold and picture hat to match. She carried sweetheart roses. Her only ornament was a rope of pearls, the gift of the groom. Mrs. B. Coulombe acted as matron of honor and wore a frock of deep brown georgette embroidered in lighter tones, with a brown picture hat and a corsage of Ophelia roses and sweet peas. Mr. H. Hayden supported the groom.

The groom's gift to the matron of honor was a novelty gold necklace and to the best man a silver match case. Mr. and Mrs. Smith were the recipients of many lovely gifts, including a silver bread tray and silver cake basket, the gift of the Imperial Dry Goods Company and staff, where the bride was formerly employed.

The bride's going away costume consisted of a blue georgette and moire gown and small red hat and a seal for coat trimmed with sable.

Mr. and Mrs. Smith will make their home in Champion, Alta.—Albertan.

Everyone in Champion and vicinity will join in wishing Mr. and Mrs. Smith a happy and prosperous future.

Will Bring British Boys to Canada

Seven of the nine provinces of Canada have joined the boy immigration scheme whereby the Canadian and the British governments have agreed to spend \$5,000,000 in the next ten years in bringing British boys out to the Dominion. The only two provinces not yet in the scheme are Manitoba and Saskatchewan, and it is expected that these will join before the year is out. Manitoba is in the fortunate position of having a farm available for the training of the boys at Birtle. The scheme is to bring out to Canada boys between the ages of 14 and 20 years and equip them for a career on the land. The boys would be brought out at the expense of the Canadian and the British governments. They will then be allotted to the provinces. Each province has to set aside a farm at which they will be trained. Later on, they will be eligible to leave the farm and work for farmers. At the age of 21 years the British and Canadian governments will advance up to \$2,500 per each boy to start him up on a farm of his own. The scheme is to go into effect April 1, 1928, and it is the intention to bring out several thousand boys.

Writing in The Farm & Ranch Review, C. W. Peterson says: "It seems obvious to me that an organization which controls the wheat production of 135,000 farmers, fifty per cent. of all Canada's wheat and twenty-five per cent. of the world's exportable surplus, and which is organized to render services to its membership at actual cost, can effect such economies in handling, and has such tremendous power, that to place it side by side with the comparatively puny efforts of even the greatest of private grain handling concerns is fantastic in the extreme."

Traffic Cop: "Sayin' what do you mean speelin' along the road like a madman? You'll kill somebody. Why, in blazes d'nt you use your noodle?"
New Driver: "Noodie? Noodie? Where is heck is the noodle? I pushed and pulled everything o' n the dashboard, and nothing woud' t'goin' her."

Special Display of Suits and Overcoats

\$27.00 One Price Only \$27.00

NOTES AND COMMENT.

Notice has been sent out to all elevator owners this year that all houses must be closed on Sunday. Relatively speaking there is little doubt that if conditions were normal such an order would be accepted without comment, but when threshing is delayed until approximately October 15th, with nothing done in this line, it would appear that such restrictions will only

tend to make a bad matter worse. With an estimated crop of one and one-half million bushels to be threshed with winter approaching it would appear that everything possible should be done to facilitate the getting of the crop into the elevators rather than having grain piled on the ground or forcing the building of bins to accommodate one day's threshing. In addition there are large numbers of men in the district who have had but little opportunity so far to make sufficient money to pay them for coming here. The threshing will unquestionably go on, but the men who are driving trucks and grain teams will be forced to lose what may prove quite a proportion of days suitable for work because delivery of the grain is made impossible on Sunday. The Chronicle is not advocating Sunday work of any kind under any condition where the waste involved would not justify the use of the Sabbath, or where there was a possibility of such work being done in season. But under the circumstances existing here at present there is every reason to feel the order is unnecessary and unjust.

Why Thousands are buying Whippets

This Chart shows graphically why people buy the Whippet. Based on reports from thousands of owners. Reasons shown in relative importance.

43% of owners bought the Whippet because of its economy of fuel. 33 miles on a gallon, compared with 25 miles on a gallon.

32% of owners bought the Whippet because of its speed. 33 miles an hour, compared with 28 miles an hour by car.

16% of owners bought the Whippet because of its dependability affected by Bendix, Mechanical, and other reliable parts and service centre. These features are natural to the Whippet. It is built to last, not extra cost and not retained on any extra cost.

Several thousand owners specify the Whippet as the best all-round road performer. The Whippet is the best all-round road performer in Canada. In combination of qualities at 33 miles an hour, the Whippet is the Whippet.

116 of owners commented on the extra room they enjoy in the Whippet. The Whippet has a roomy arrangement of interior space. You can easily comfortably ride with your family.

The Overland Whippet now is the recognized leader in the field. Famous in all domestic body types.

Storing of Roots
And Vegetables

(Hyperbolized Paragraph Note.)

Owing to the comparatively long storage period in the prairie provinces particular care to its many phases must be exercised. A fairly constant temperature and humidity are essential for all roots and vegetables; specimens for storage should not be too immature or too old; decay usually begins in bruised heads, damaged and injured individuals, do not store tender vegetables that have been exposed to frost; severe frosts will also injure the keeping qualities of such hardy vegetables as beets, carrots, turnips, beets, onions, radishes, etc. There are some of the conditions that require consideration before and during the selection of roots and vegetables for storage.

While the majority of roots may be successfully stored in bins in a relatively moist, cold environment, for small quantities, the method of storing in sand is recommended. In tests of this practice conducted at the Experimental Farm, Indian Head, Sask., during the winter 1926-27, best results followed the use of dry sand as compared with the use of moistened sand. The same method of storage is recommended for winter radish, turnip, rutabaga and salad.

The air temperature of the cellar from October 15, 1926, to March 21, 1927, averaged 39.01° Fahr., ranging from 32 to 50° Fahr. in the mornings and 39.97° Fahr., ranging from 31 to 50° Fahr. in the evenings. In the same root cellar potatoes were stored in bins as large as 9.5 by 7.5 by 4.5 feet deep on October 6, 1926. No sprouts large enough to require removal were produced in this cellar until May 24, 1927, indicating dormancy so long as the temperature remained relatively constant. Another observation made during the storage period was that the least amount of sprouting took place on potatoes stored in jute sacks.

Under similar temperature conditions cabbage may be stored hung up by the roots to the ceiling or on heads in slatted bins or on shelves. Firm uninjured heads only should be stored, in the same case each lifted from the garden before severe frosts with all roots attached and replanted in moist sand kept fresh and crisp until after Christmas.

A small coal burning heater which was attended to morning and evening was used to keep the cellar at 40° Fahr. near at hand cases, squash, carrots and pumpkins were stored. The onions were in excellent condition in the spring when a number of the mature bulbs were set out for the production of seed, and many sets were planted in the garden for the ripening of the bulbs. Squash, carrots and pumpkin, however, did not keep well. Drier and warmer storage conditions are required for these vegetables and the ripening of the "fruit" the better will they keep in storage.

Local and General

F. M. Watts reports a sunflower head with thirty-three blossoms. This is going some in the decorative line.

Horatio Willies renders sincere thanks to all friends who so kindly visited him, also for gifts of flowers and kind inquiries while in Holy Cross hospital Calgary.

The street lights were installed on town and Tuesday night their presence was greatly appreciated by pedestrians as well as

drivers of cars. The streets may now be navigated on the darkest of nights with a degree of comfort noticeably absent before.

Report is current that preparations are under way for the organization in Vulcan of a chapter of the Order of the Eastern Star. The charter list has been completed.

Owing to the very bad condition of the roads the regular meeting of the Women's Institute was postponed until Tuesday, October 18th, when it will be held at the home of Mrs. J. D. McDougall.

Screen doors are being replaced by storm doors these days, and many other signs indicate that the season of mosquitoes and flies is almost a thing of the past for this year, while colder weather is being anticipated.

Tom Copeland, the Scottish entertainer, was greeted by a good turnout in Campbell's hall on Monday evening. The program throughout was fully up to advance notices and was duly appreciated, the Scotch humor in particular being very favorably commented upon. His appearance here was under the auspices of the Ladies' Aid and the results, it is understood, were quite satisfactory.

A new chimney on Gundersen's store is among the noticeable improvements on the main street during the week. Lawrence Frame had charge of the mason's part of the job and Ed. Dalsin added

the galvanized iron extension. Considering the proximity of the fluid that made Lethbridge famous, the result is highly creditable.

HAD NEPHEW
IN AIR RACE

Writing from Spokane on Sept. 28 to alter the address of his paper, W. C. Fry says: "We have just had a very busy week here as the national Air Derby terminated here, which was very exciting, more so for us because we had a nephew in Class A, who flew from New York to Spokane. Although he did not get first money, he got into the money and would have won easily if his plane had been faster, as nearly all others had trouble on the way, but he never lost a minute. Hope you get nice weather up there for threshing."

**Dominion Is
Prosperous**

The prospect of an excellent wheat crop in the West is the outstanding factor in the Canadian agricultural situation. Alberta expects to harvest the largest crop in the history of the province, and the reports from Manitoba, Saskatchewan and Ontario are sufficiently favorable so that there is little question but that this year's crop will be nearly 100,000,000 bushels larger than that of 1926. Fall wheat is now being planted and the farmers of Ontario apparently intend to plow twice as large an acreage as was plowed in the fall of 1926. Naturally, the prospect of good business in the farming districts is having a satisfactory effect upon wholesale and retail trade and manufacturing. While no factors in the general situation are classified as very unfavorable, and only two as unsatisfactory, there are four major factors mentioned as excellent, sixteen as favorable and four as medium. Such a record bespeaks prosperity. The manufacturing situation is classified as excellent because a high level of activity prevails in almost every manufacturing industry in the Dominion. While the newsprint industry was trading at higher capacity in 1926 than in 1927, the capacity of the industry has been much increased in the past year; production is increasing in Canada, and decreasing in the United States. Electric energy generated has attained new high levels during the year, but rapid expansion in this industry can no longer be considered exceptional in Canada. There might be some question as to the classification of the forest industry but for the fact that the bad times in the lumber industry have already been discounted and that the actual volume of business in 1927 is well ahead of that recorded in 1926. The continued low level of the price index of lumber and animal products is the only important unfavorable element in the general price situation.—Royal Bank Monthly Letter.

Local and General

C. W. Thornton, of Granum, was a visitor in town over the week-end, and looked up a large number of old acquaintances while here.

Quite a number of United States citizens, who own land in Alberta, are joining the Wheat Pool. Just recently Senator J. W. Reid, of Idaho, signed a contract covering two and a half sections of land in the Make-peace district.

The Service Garage has added to their equipment lately a new gasoline pump of the visible type and will carry ethyl gas as well as the ordinary kind.

Many threshing crews were assembled to go to work on Monday morning but their departure to the country was adjourned for the better part of a week by Sunday night's storm.

Trucks will enter very largely into the transportation of the wheat from the threshing machine to the elevator this year. There would seem to be almost unlimited number of trucks available for the work, and if these are kept busy horses will be relegated to a back seat as drivers of wheat.

Threshing of wheat began at the end of last week, but was checked almost before it was well under way by a storm on Sunday evening, which furnished an almost unlimited amount of moisture, including considerable snow. Unless weather conditions improve rapidly it will be a number of days before further threshing is possible.

It is to be hoped the near future will see an extension of the application of gravel to the streets in Champion. After and during the recent storm was a good time to estimate the improvement made on the main street. Where there was gravel was certainly the most pleasant place to travel. Where there was none anyone would hate to drive if it could possibly be helped.

The tomato is the only new salad ingredient known to modern times. The ancient Egyptians used onions and garlic. Confucius and his contemporaries liked cucumbers, and the Chinese have used watercress, mustard, nasturtium leaves and hard-boiled eggs in salads since civilization began. Lettuce and radishes were favorites with the Persians as far back as history goes.

According to some authorities the dust mulch theory has been completely exploded. It would be interesting to have some of the experts who have reached this conclusion examine the conditions where soil drifting has occurred. In every instance the soil covered by the drift will be found to retain moisture to a remarkable extent as compared to portions of soil not covered by the drifting soil.

The total handleings of the Alberta Pool elevators from the 1926 crop was 5,376,758 bushels for the first two hours, or an average of about 128,000 bushels per elevator. The first nine elevators were: Strone, 275,638 bus.; Ponoka, 223,659 bus.; Condale, 222,372 bus.; Killam, 220,832 bus.; Hauser, 214,943 bus.; Daysland, 178,169 bus.; Woodhouse, 176,344 bus.; Dalemead, 168,173 bus.; Estevan, 165,470 bus.

This is the third wet fall experienced here in succession, and while the old chestnut about there being a good soil reserve for next year is still worked when possible, most people, especially the harvester, are about fed up with this type of weather. The harvesting of the present crop

without disastrous damage is naturally more important to the farmer than a supply of moisture for growing another one.

**Dies Suddenly
At High River**

The death occurred suddenly at High River on Thursday October 6th, of Mrs. George M. Woods, aged 65 years after an illness of but a few hours. The deceased was a sister of Mrs. T. Sisson of Champion, who in addition to a brother and two sisters in Toronto, and a daughter, Mrs. Murray of High River, with whom deceased lived, survived her. The funeral took place at High River on Saturday Mr. and Mrs. T. Sisson, Mr. and F. Sisson and Mrs. Tracy of Calgary, attended from here. Many in this vicinity were acquainted with Mrs. Woods, who made visits here, and will join the relatives in mourning her loss.

**Municipal Officers
Visit Champion**

W. D. Spence, deputy minister of municipal affairs, accompanied by J. Chapman, municipal inspector, spent Monday and Tuesday here. The main object of their visit was the urging of the taking over by the municipality of the collection of rural school taxes, instead of simply collecting arrears as at present. They left here on Wednesday morning to visit municipal districts east of here.

No one makes more thorough or scientific examinations than does John F. Miller of Calgary, who stops at the Hotel in Champion on Friday, October 14th. Remember the date.
